

EARTH SURFACE PROCESSES

A Journal of Geomorphology

The Journal of the British Geomorphological Research Group

Managing Editor:

Professor Michael J. Kirkby, Department of Geography, University of Leeds, Leeds LS2 9JT.

BGRG Editor:

Dr. John Hails, Director of Environmental Studies, University of Adelaide, Adelaide, South Australia 5001.

Editorial Board:

Professor JOHN R. L. ALLEN,
Sedimentology Research Laboratory,
Department of Geology,
University of Reading,
Whiteknights,
Reading RG6 2AB, England.

Professor RICHARD J. CHORLEY
Department of Geography,
University of Cambridge,
Cambridge, England.

Dr. JOHN DALRYMPLE,
Department of Soil Science,
The University of Reading,
London Road,
Reading RG1 5AQ, England.

Professor IAN DOUGLAS,
Department of Geography,
The University of New England,
Armidale, NSW 2351,
Australia.

Professor PETER D. JUNGRIUS,
Fysisch Geografisch en bodemkundig Laboratorium
Universiteit van Amsterdam,
Dapperstraat 115,
Amsterdam-Oost,
Netherlands.

Professor N. R. MORGENSTERN,
Department of Civil Engineering,
The University of Alberta,
Edmonton,
Alberta,
Canada.

Professor TROY L. PÉWÉ,
Department of Geology,
Arizona State University,
Tempe, Arizona 85281,
U.S.A.

Professor RONALD L. SHREVE,
Department of Geology,
University of California, Los Angeles
Los Angeles,
California 90024
U.S.A.

CONTENTS

Volume 2, Issue Nos. 1-4

EARTH SURFACE PROCESSES

Issue No. 1, JANUARY-MARCH 1977

Michael R. Leeder: Bedload Stresses and Bagnold's Bedform Theory for Water Flows	3
Keith Beven: Hillslope Hydrographs by the Finite Element Method	13
R. F. Warner, E. J. McLean and G. Pickup: Changes in an Urban Water Resource, An Example from Sydney, Australia	29
Harold E. Malde and Arthur G. Scott: Observations of Contemporary Arroyo Cutting Near Santa Fe, New Mexico, U.S.A.	39
Donald A. Davidson: The Subdivision of a Slope Profile on the Basis of Soil Properties: A Case Study from Mid-Wales	55
N. L. Watts: Pseudo-anticlines and Other Structures in Some Calcretes of Botswana and South Africa	63
A. S. Goudie: Sodium Sulphate Weathering and the Disintegration of Mohenjo-Daro, Pakistan	75

SHORT COMMUNICATION

K. S. Richards: Slope Form and Basal Stream Relationships: Some Further Comments	87
--	----

BOOK REVIEWS	92
------------------------	----

Issue Nos. 2 and 3, APRIL-SEPTEMBER 1977

Editorial	99
J. de Ploey: Some Experimental Data on Slopewash and Wind Action with Reference to Quaternary Morphogenesis in Belgium	101
H. J. Mùcher and J. de Ploey: Experimental and Micromorphological Investigation of Erosion and Redeposition of Loess by Water	117
J. Savat: The Hydraulics of Sheet Flow on a Smooth Surface and the Effect of Simulated Rainfall	125
A. C. Imeson and P. D. Jungerius: The Widening of Valley Incisions by Soil Fall in a Forested Keuper Area, Luxembourg	141
A. C. Imeson: Splash Erosion, Animal Activity and Sediment Supply in a Small Forested Luxembourg Catchment	153
F. J. P. M. Kwaad: Measurements of Rainsplash Erosion and the Formation of Colluvium beneath Deciduous Woodland in the Luxembourg Ardennes	161
J. M. Verstraten: Chemical Erosion in a Forested Watershed in the Oesling, Luxembourg	175
H. Th. Riezebos and E. Seyhan: Essential Conditions of Rainfall Simulation for Laboratory Water Erosion Experiments	185
F. Ahnert: Some Comments on the Quantitative Formulation of Geomorphological Processes in a Theoretical Model	191

M. J. Kirkby: Soil Development Models as a Component of Slope Models.	203
D. Barsch: Nature and Importance of Mass-wasting by Rock Glaciers in Alpine Permafrost Environments	231
H. van Steijn: The Development of a Laboratory Set-up to Measure Creep Induced by Freeze-thaw Cycles	247
S. T. Trudgill: Problems in the Estimation of Short-term Variations in Limestone Erosion Processes	251
D. Gabriels, J. M. Pauwels and M. de Boodt: A Quantitative Rill Erosion Study on a Loamy Sand in the Hilly Region of Flanders.	257
G. Richter and J. Negendank: Soil Erosion Processes and their Measurement in the German Area of the Moselle River	261

Issue No. 4, OCTOBER–DECEMBER 1977

John S. Bridge and Jack Jarvis: Velocity Profiles and Bed Shear Stress Over Various Bed Configurations in a River Bend	281
N. W. Rutter: Methods of Terrain Evaluation, Mackenzie Transportation Corridor, N.W.T., Canada	295
Lon D. Drake: Depositional Fabrics in Basal Till Reflect Alignments During Transportation	309
Kin-Che Lam: Patterns and Rates of Slopewash on the Badlands of Hong Kong	319
Stephen P. Leatherman and Allan T. Williams: Lateral Textural Grading in Overwash Sediments	333
Ran Gerson: Sediment Transport for Desert Watersheds in Erodible Materials	343
M. A. Carson: Angles of Repose, Angles of Shearing Resistance and Angles of Talus Slopes	363
Julian D. Orford: A Proposed Mechanism for Storm Beach Sedimentation	381
John S. Bridge: Flow, Bed Topography, Grain Size and Sedimentary Structure in Open Channel Bends: a Three-dimensional Model	401

SHORT COMMUNICATIONS

William F. Tanner: Estimators of Alluvial Bed Load Transport	417
Terence R. Smith and Thomas Dunne: Watershed Geochemistry: the Control of Aqueous Solutions by Soil Materials in a Small Watershed	421
C. B. Crampton: A Note on Asymmetric Valleys in the Central Mackenzie River Catchment, Canada	427
A. C. Imeson: A Simple Field-portable Rainfall Simulator for Difficult Terrain	431
Ian Statham: Angle of Repose, Angles of Shearing Resistance and Angles of Talus Slopes—a Reply	437
